

## Human Machine Interface (HMI Project)

last update: 2/22/07

### Objective

Develop devices that controls or monitors human attributes, activity or health.

### Block Diagram of Solution

### Team Projects

Each team is required to implement a complete solution that meets the objective. Projects will be evaluated based:

- Complexity
- Completeness of Design
- Ease of use, integration and maintenance
- Clarity, format and completeness of report

### Project Team Projects

It is recommended but not required that teams have student from both Digital (ENGR 250/270) and Analog (ENGR 251/252/253) classes since most subsystems have digital and analog circuitry.
